

The American Institute of Architects Continuing Education Systems
AIA/CES Registered Provider Program Summary

Provider Name: Professional Products of Kansas, Inc.

Program Title: Protecting Masonry from Water Intrusion and Graffiti

Program # BL0601

Length: 1 Hour

Credits: 1 LU Hour

HSW: Yes

Program Overview: A description of the damaging effects that water creates for above-grade masonry structures and the role that water repellents play in preventing or eliminating them. RTV Silicone Rubber technology will be discussed in detail with a focus on its graffiti resistant properties.

Learning Objectives: At the conclusion of the program participants will be able to identify the types of problems that water creates for masonry structures. Participants will gain an understanding of the composition, mechanism of action, and performance characteristics of the three most widely specified clear, penetrating water repellents and their appropriateness for specific applications. Additionally, participants will be able to identify several key elements that should be addressed in the water repellent section of a project specification.

Facilitator Qualifications: All Professional Products of Kansas CES facilitators undergo detailed instruction in both classroom and field settings regarding water repellent performance and application. They have all received training related to CES presentation guidelines and reporting requirements.

Method of Delivery: *Using Water repellents to Prevent Water Intrusion* is delivered via Power Point Presentation

Audio/Visual required: The CES facilitator will supply the notebook computer and projector for the presentation. An electrical source and screen or wall area to project the presentation are required.

Cost to participants: There are no costs associated with this program.
