

STONHARD

Lunch Presentation

Resinous Floors and Wall Systems Program J 503

Everyday standards for cleanliness and durability have become paramount to end users in a multitude of environments. Resinous high performance flooring is the long-term solution for industrial, municipal and commercial sectors. Stonhard systems have been the choice for extreme environments in need of corrosion protection. We will review the latest developments in polymer flooring and wall systems.

Stonhard is the largest manufacturer and installer of resinous commercial and industrial flooring.

STONHARD

Topics of discussion: Stonhard Overview
